

```

#include<stdio.h>
#include<conio.h>

class A
{
public:
int x , y ;
void getdata()
{
printf("\nEnter value of x and y");
scanf("%d%d",&x , &y);
}
};
class B : public A
{
public :
void product ()
{
printf ("\nProduct =%d", x * y);

}
};
class C : public A
{
public:
void sum()
{
printf("\nSum= "); x + y;
}

};
int main()
{
B obj1;
C obj2;
obj1.getdata();
obj1.product();
obj2.getdata();
obj2.sum();
return 0 ;
}

```
